

Caring for the invisible wounds.

The UF Health Jacksonville Leon L. Haley Jr., MD, Brain Wellness Program provides clinical care for military veterans and other adults experiencing persistent health problems associated with mild to moderate traumatic brain injuries. Applicants undergo a full diagnostic assessment and screening before acceptance into the program.

Our goal is to aid in healing and to provide treatment and recovery options for individuals, using a holistic approach.

Our outpatient model customizes treatment for each patient to meet their cognitive, emotional and physical needs.

Services are provided to military veterans and first responders at little to no out-of-pocket cost.

Visit UFHealthJax.org/brain-wellness, call 904.244.3289 or email us at UFHealthBrainWellnessProgram@jax.ufl.edu for more information.

In collaboration with the Avalon Action Alliance.
